

# SANTOPRENE® 291-60B150

A colorable, specialty thermoplastic vulcanizate (TPV) in the thermoplastic elastomer (TPE) family. It is especially formulated to bond to PC, ABS, PC/ABS, ASA and PMMA for applications where hard/soft combinations are required. This grade of Santoprene® TPV is shear-dependent and can be processed on conventional thermoplastics equipment for injection molding or extrusion.

### **Key Features**

- · Designed for excellent adhesion to PC, ABS, PC/ABS, ASA and PMMA (cold insert or 2K [two-shot] molding).
- · Broad processing window in injection molding.
- · Recommended for applications requiring superior part surface appearance.
- · Designed for soft touch applications.

Processing Notes

Desiccant drying for 3 hours at 90 °C (194 °F) is recommended. Because of its inherent nature to bond, this material may, on occasion, agglomerate from shipping and storage. Santoprene® TPV is incompatible with acetal and PVC.
