## Irganox<sup>®</sup> XT 500

## High performance antioxidant blend for improved processing stability

Characterization

Irganox XT 500 is a high performance antioxidant blend with good hydrolytic stability offering improved processing for polypropylene film.

**CAS** number

Preparation

**Applications** 

Irganox XT 500 has been designed particularly for BOPP film applications.

Features/benefits

Irganox XT 500 offers excellent melt flow index control during polypropylene processing, minimizing BOPP film line breakages.

Irganox XT 500 shows outstanding color retention during polypropylene processing and helps maintain good regrind color.

The components of Irganox XT 500 are hydrolytically less sensitive compared to various other high performance solutions, allowing thus for ease of handling.

**Product form** 

Irganox XT 500

white powder

Guidelines for use

The normal usage levels for Irganox XT 500 range between  $0.05\,\%$  to  $0.15\,\%$  depending on polymer and processing conditions.

**Physical properties** 

Melting range 50–190 °C Flashpoint 297 °C Density (20 °C) 1.15 g/ml

Vapor pressure (20 °C) 7 E-10 Pa (extrapolated)

Bulk density

Powder 380-500 g/l

Solubility (20 °C) g/100 g solution

 Acetone
 < 0.1 g</td>

 Ethanol
 < 0.1 g</td>

 n-Hexane
 < 0.1 g</td>

 Toluene
 < 0.2 g</td>

**Handling & Safety** 

In accordance with good industrial practice, handle with care and prevent contamination of the environment.

For more detailed information please refer to the material safety data sheet.
